Root-pruning of Evergreens is absolutely necessary for successful transplanting. Play safe and Broadleaved Evergreens can such a price be given? Following the name of each variety, we have given the approximate height, under average conditions, of the plant at maturity. Remember that practically all can be kept to half this height and many to one-fourth by shearing of the tops. This operation together with proper fertilization also tends to increase the denseness and beauty of your Evergreen Planting. For dozens of other varieties and sizes, send for 70 Page Descriptive Catalogue, "Everything That's Good and Hardy." They surpass all other plants in brilliancy of foliage, fruits and flowers; their marvelous continuous fresh appearance at all seasons of the year brings joy to our hearts. All varieties withstand shade.

year's list price. Our New Plan Price Follows How

EVERGREEN BITTERSWEET

(Euonymus) (Lovely plants that you, too, will love) Spreading or upright plants with thick, glossy evergreen leaves. Flowers are insignificant, being of a greenish white color, but are followed by truly beautiful orange-red fruit. Most varieties can be used for formal or informal (depending on shearing) edging or dwarf hedge, specimens or vines. Thrives in sun or shade. WINTERCREEPER (E. radicans)

Dense growing trailing vine; can be trimmed to form a low border or hedge; clings to stone

Evergreen shrub or vine with thick, fleshy stems and leaves and an abundance of red fruit with yellow pods; very attractive. We consider this one of the finest plants in existence. We carry a stock of 50,000 plants to take

RHODODENDRONS

Rhododendrons are the most handsome of all broadleaved evergreen plants; foliage is large and leathery; immense, broad panieles of flowers are produced in early Summer. The location and preparation of the Rhododendron bed is most important. Select a partially shaded location and preferably one where the plants will be protected from severe winds by buildings, evergreens, or other shrubbery; plant in at least eighteen inches of German Peat and keep mulched both Summer and Winter with peat, grass clippings, leaves, or well rotted manure. We dig all Rhododendrons with ball of dirt to insure successful planting.

Buy from Nurserymen Employing Trained Men

Exposure of plants to drying air, or warm store-room for a short time often

injures or kills such plants.

An Evergreen, especially, if roots are dried will set its resinous sap never to flow again. Often the plant will not show its injured or dead condition for some time. Properly Trained Nurserymen realize the necessity of Proper Care for plants at every minute from digging to planting.

Properly Trained Nurserymen can give you much valuable information that will

insure success with your plants.

Properly Trained Nurserymen can give you the right plants for the right place and

Cole's Hardy Perennials and Rockery Plants

The hardy perennial garden is continuing to increase in popularity, as there is practically no period from April until November, when it does not furnish bloom of some kind, not only for one season.

but year after year with proper attention.

Hardy Perennials have a wide variety of uses—in beds, borders, as a foreground planting for shrubbery plantings, in rockeries, and in the formal and informal gardens.

Varieties marked with an asterisk (*) are especially suitable for the rockery garden.

Following the variety names, we have given the approximate height, under average conditions, of

(New Low Prices with a New Guarantee)

the plant and maturity.

An innovation in Nursery Circles. It has been generally considered that Perennials carry a high mortality rate—often as high as 50% when purchased from some heated storerooms.

To dispel this fear—we offer To Guarantee Every Perennial purchased from us during the Spring and Summer of 1932 to live and thrive. All we require is that you report any loss together with your receipt before September 1, 1932. Losses will be immediately replaced with additional plants.

Cole Has Faith in Plants of Known Value.

No true flower lover will hardly be content without some of the old-fashioned Perennials to adorn the garden or to cut and bring into the house where they may be enjoyed by the whole family.

HARDY CHRYSANTHEMUMS

CHRYSANTHEMUMS. The most satisfactory of all our Fall-blooming plants. Coming into bloom in the latter part of September Chrys-anthemum beds are a riot of color until cut down by the severe frosts of Winter Type of Flower is given after the description.
